

ICTC Philippines: An ISO 9001:2015 Certified Quality Management System

Address:
117-A Technology Avenue,
Laguna Technopark, Binan 4024

Interconnect Cable Technologies Corporation (ICTC), a contract manufacturer with headquarters established in Florida (1988), opened a manufacturing facility in the Philippines to develop more business opportunities and serve other local industries. The facility began to produce high quality cable assemblies and electronic box builds in January, 2017 and has already produced and delivered hundreds of different assemblies to our valued customers world-wide. ICTC Philippines (ICTC PI) is equipped with a highly competent workforce and high end equipment including terminating machines, system testers, the most modern stripping, measuring and monitoring equipment.

To further improve our quality management system and continually maintain the respect and partnership of our customers, ICTC PI was certified by SGS Philippines with conformance on ISO 9001:2015 in May 2018 and perform a semi-annual internal QMS audit. As a result of the audit activity, we are qualified as compliant to ISO 9001:2015 requirements with no major and minor nonconformities. As part of our continual improvement, we are striving to achieve compliance with IATF 16949:2016 requirements this November 2018.

We are very glad to have the utmost support from our management, customers, partners and employees which has resulted in the continuous growth and success of the organization.

ICTC Philippines welcomes your inquiries and hopes to assist you with your offshore cable and box build requirements. As a Philippine operated facility, we are also **not subject to the increased tariffs** and defense industry restrictions from China.

SGS Philippines auditor's verification audit on heat shrink, crimping and measurement process.

ICTC Philippines in Wire and Cable Show 2018

With an aim to develop business locally and open opportunities with local suppliers, ICTC PI attended the Wire and Cable Show Philippines 2018 at the SMX Convention Center Mall of Asia Complex on June 27th & 28th, 2018. The expo consisted of wire & cable manufacturers, compound suppliers and other entities related to the electrical industry. The booth showcased our line of product and a presentation of one of our “Komax” brand advanced technology stripping machines.

The annual cable expo was attended by 5000 attendees, both local and international. ICTC PI's booth was visited by hundreds of people from different areas of industry and, some we expect to become business partners in the future. Our booth was supported by the presence of ICTC's President Mr. Sareet Majumdar, Global Program Manager Mr. Al Dayao and Operations Manager Ms. Myrna Alvarez.

ICTC is very glad we were able to participate in the event and look forward to continuing working on growing our footprint in the Philippines.
