**Position/Title:** Quality Inspector

### Job Duties

Accurately perform all in-process and final inspections of assemblies in compliance with company policy, criteria provided and customer and/or relevant industry standard to which the organization subscribes.

- Perform inspections of work in-process at various points in the manufacturing process as well as final Inspection of product directly before shipment to customer.
- Document inspection results (defects) with accuracy in the inspection database.
- Provide feedback to Management concerning results of inspections.
- Assist in the generation, investigation and closure of internal and external corrective actions.
- Perform receiving inspections on build to print and other materials as required.
- Complete other duties as assigned.

### Qualities

- Ability to interact, work effectively with others at different levels of the organization and be a participative team member
- Ability to work in a high quality, fast-paced and deadline driven environment, while remaining focused and carrying out tasks in a timely and accurate manner.
- Organized, detail-oriented, dependable and trustworthy where this individual will come in contact with complex and sensitive documents.

### Skills & Qualification requirements

- Minimum Experience: 1-2 years' working as a Quality Inspector.
- Excellent working knowledge of IPC-A-610 (Acceptability of Electronic Assemblies) and or IPC-620 (Requirements and Acceptance of Cable and Wire Harness Assemblies) Workmanship Standards. Current or previous IPC Certifications Preferred.
- Use of basic measuring tools (i.e., calipers, scales, etc.)
- Ability to identify electronic and or cable and harness components.
- Good understanding of manufacturing documentation (i.e., Bill of Materials, Assembly Drawings, Schematics, Wiring Diagrams and other Visual Aids.)

### Education

- High school diploma or equivalent.
-
